Synopsis (from the publisher)

Aldous Huxley's tour de force *Brave New World* is a darkly satiric vision of a 'utopian' future - where humans are genetically bred and pharmaceutically anesthetized to passively serve a ruling order. A powerful work of speculative fiction that has enthralled and terrified readers for generations, it remains remarkably relevant to this day as both a warning to be heeded as we head into tomorrow and as thought-provoking, satisfying entertainment.
